Cocktail Detail Page

- By Direct Input

The screenshot shows a web browser window with the Nu Html Checker website. The browser's address bar shows the URL `validator.w3.org/nu/#textarea`. The website has a dark blue header with the text "Nu Html Checker". Below the header, a message states: "This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change". The main section is titled "Showing results for contents of text-input area". Under "Checker Input", there are tabs for "source" (selected), "outline", and "image report", along with an "Options..." button. The "Check by" dropdown is set to "text input". A large text area contains the HTML code for a cocktail detail page, including a footer with Font Awesome and Bootstrap links, and a script for comments. A "Check" button is at the bottom of the text area. Below the text area, a message says: "Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings." There is a "Message Filtering" button. A green banner at the bottom of the checker area states: "Document checking completed. No errors or warnings to show." Below this, the "Source" tab is active, showing the full HTML code with line numbers from 1 to 30.
